## Plastic Card Personalisation.

### Plastic cards designed your way

With our state of the art & high quality digital & 'drop on demand' digital printing facilities, we are able to personalise your plastic cards whatever your requirements. Logos, text, colour panels and bar codes can all be personalised & are stringently managed by us to ensure your plastic cards are of the highest quality.

We can also offer flexibility on small run dye-sublimation, re-transfer plastic card personalisation with the ability of encoding and a comprehensive range of high speed chip technologies. Amongst these processes a range of NBS and DataCard thermal and embossing systems including secure scratch off labelling allows for maximum plastic card individuality for customer, company, & brand recognition. We can offer all plastic card personalisation services including:-

- Photo ID Printing
- Drop On Demand
- Thermal Printing
- Embossing
- Mag Stripe Encoding
- Die Sublimation
